

WAI-WEST HORTICULTURE, STOKE, NELSON

PROJECT DESCRIPTION

Wai-West was established in 1983 and today are a large and diverse operation, exporting to over 50 countries around the world. The company owns, leases and manages over 500 acres of apple, kiwifruit and boysenberry orchards.

This accessway utilised **Forta Ferro[®]** macro synthetic fibres as the contractor had previous experience with their ease of mixing, placing and performance.

The contractor has managed many large pours including those at Ravensdown fertiliser works.

KEY POINTS

- Reduced Shrinkage Cracking
- Saved Time
- Cost Savings
